

# Recommended Free AI Tools

AI Builder Lab | Student Resource

---

Throughout this course, you'll need access to an AI assistant. The good news: there are several excellent options that are completely free. Here's what we recommend.

## Your Options

### Option 1: ChatGPT (free tier)

Available at [chat.openai.com](https://chat.openai.com). Create a free account. The free version (GPT-4o mini) is sufficient for everything in this course. No credit card needed.

### Option 2: Claude (free tier)

Available at [claude.ai](https://claude.ai). Create a free account. Generous free usage for conversations. No credit card needed.

### Option 3: Google Gemini (free)

Available at [gemini.google.com](https://gemini.google.com). Free with a Google account. Good for students who already use Google tools.

### Option 4: Microsoft Copilot (free)

Available at [copilot.microsoft.com](https://copilot.microsoft.com). Free with a Microsoft account. Good for students who use Microsoft tools.

## Which One Should I Pick?

Any of them. They all work for this course. The prompting techniques you'll learn apply to all AI tools — that's the whole point. Pick one, stick with it, and switch if you want to compare later.

**Our suggestion:** If you have no preference, start with ChatGPT or Claude. Both have generous free tiers and work well for the building projects in this course. You can always try a different one later.

## Quick Comparison

Tool	Best For	Sign Up	Free Limit
ChatGPT	General use, coding help	Email	Generous daily limit
Claude	Long conversations, writing	Email	Generous daily limit
Google Gemini	Google ecosystem users	Google account	Unlimited basic use
